October 24, 2012

We are pleased with our decision to provide the HUMAN Healthy Vending program to our students at Cape Henry Collegiate. Our students love it, their parents approve and the School feels good knowing our community always has healthy snack choices available to them.

When HUMAN approached us, we were somewhat skeptical. We knew some students would go for the healthy snacks and beverages, but the response has surpassed our expectations. Sales from the HUMAN machines have been strong, with revenues exceeding those generated from the traditional snack vending machines. Students can be overheard talking about the healthy snacks in the hallways, articles have been written about them in the student paper and our parents are pleased.

The HUMAN Healthy Vending machines are high tech and accommodate a good variety of snacks and beverages. HUMAN monitors sales via the internet, consequently the machines are kept well stocked and maintained. Their service has been excellent.

We are happy to recommend this program to any school, especially those striving to find value added options to satisfy discriminating parents and students.

Sincerely,
